

Success Story

# Woodenbridge and Sage 100 craft secure, remote ERP access

Cabinet design firm pivots to the cloud to empower remote workforce with hosted ERP model

“With Sage 100 I can focus more of my attention on the financial side of the business and less on the IT side.”

**David Coburn**

CFO and Owner, Woodenbridge

### The challenge

When the coronavirus pandemic hit, the majority of Woodenbridge's staff began working remotely. With no one in the office, the company's Sage 100 server moved to the owner's home — creating both a security risk and an accessibility challenge.

### The solution

Having already successfully migrated another company over to Sage Partner Cloud, the CFO had to act quickly. By moving Sage 100 to the cloud, Woodenbridge employees can work productively from home, with improved network security and fewer time-consuming administrative tasks.

### The outcomes

Working in the cloud allows the company to better support its remote workforce while freeing internal resources for more strategic tasks. This has been a game changer for the Woodenbridge team, helping to preserve business continuity during a challenging time.

- Supports a 100% remote operating model.
- Migration took less than one day with zero downtime.
- Automatic backups protect business data.
- Frees internal resources for more value-added tasks.
